

Buzzeo, Toni. *"R" is for Research!* Fort Atkinson, WI: Upstart Books, 2008. 28p. \$17.95 (ISBN: 9781602130302)

This is a fun 28 page picture book that incorporates the alphabet to tell the story of four students learning how to do research at the library. No surprise that L is for librarian, but there are some creative uses of the rest of the alphabet

The illustrations, by Nicole Wong, are full of strong color and clear details. There is a lot of action on the pages to share if you are storytelling including the library cat who adds his thoughts to the story.

Buzzeo's personal website, tonibuzzeo.com offers a downloadable curriculum guide and additional bibliographies to accompany the book.
